Hi Soumya,

Thank you for your quick response. I'll reach out if we need anything else.

Thanks,
Jessica

Hello Jessica,
Here are the updates on Pennsylvania facilities:

1. **B. Braun:** The emissions, source location, and release parameters all appear to be accurate.
2. **ACS:** DEP did not see any issues with the data provided for the site.
3. **Cosmed:** The company has not been required to submit an emission inventory for the DEP and hence unable to confirm.

Croda Inc. is another facility in Pennsylvania with total facility emissions of more than 0.05 tons of EtO per year.

Hi Randy,

Yes, it's a large file, so I had to send it using our file sharing site. I've never used it, so I didn't realize it would go through and look like a fake email. Cristina sent an email to all the air directors regarding a request for data for EtO Commercial Sterilizers and you can see below since it might not have come through with the original email. We were just trying to also give a heads up to the staff that may have to review the data. I also tried to send it to Craig Evans, but I'm not sure it went through.

Let me know if you have any questions.

Subject: EtO Commercial Sterilizers Data Review

Hi Mark,

As you may recall, EPA is crafting a revised EtO Commercial Sterilizer MACT. We are in the process of evaluating the emissions data and associated process parameters gathered for commercial sterilizers. About 40% of the responses were from Section 114 questionnaires and the remainder from permits and inspections or compliance reports. In Region 3, we have 11 facilities from 4 states—VA (4), PA (3), MD (3) and WV (1). The data for these facilities will be used for modeling purposes in order to support the national rulemaking. OAQPS has requested that we share with you the data collected to date as well as providing an opportunity to update or correct the data. To review these files, it may take air toxics, permits, and/or enforcement personnel to participate.

Primarily, the focus should be on:

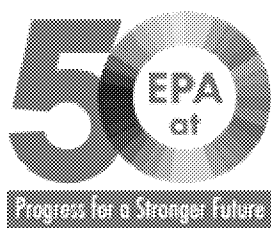

1. Are emissions accurate,

2. Are sources correctly located, and
3. Are release parameters accurate.
4. Please review as many facilities as you can— especially those with total facility emissions more than 0.05 tons per year.

We would like any updates or corrected data from you by February 10th. If you have any questions or need additional time, please contact Alice Chow, of my staff at chow.alice@epa.gov or Mary Cate Opila at opila.marycate@epa.gov.

Thanks, Cristina

Is the secure e-Mil I received from you actually something that you sent as a secure delivery? There is no other context or message.
